

■ Manufacturing, repair and assembly of mechanical, optical and electrical/electronic components and assemblies, devices and installations

For the realisation of the manufacturing, repair and assembly of mechanical, optical and electrical/electronic components and assemblies (also for large devices) we are equipped with the necessary tools, machinery and facilities including a 5-tons indoor crane. Our staff is highly trained and has acquired in-depth knowledge and experience in restoring historical devices.

Device assembly

Assembly desk

Repair of optical systems

Assembly of water measuring systems

Optical inspection device, mounted

FerryBox I, mounted
