### About us

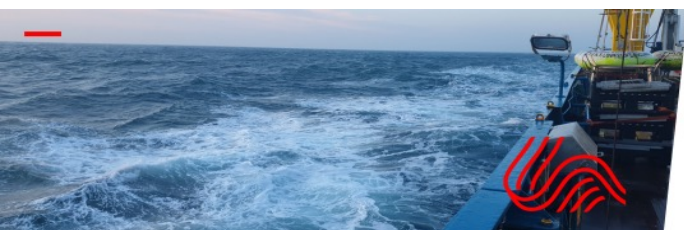

**-4H-JENA engineering GmbH** is a medium-sized company with diverse and innovative projects in the fields of measurement technology, optical inspection, maritime technology and industrial automation. At our locations **in Jena** and **Kiel**, around 40 dedicated employees develop individual complete solutions for our customers. We are characterised by a friendly working environment, technical diversity and exciting tasks.

### Your tasks

- Installation, commissioning and maintenance of electrical systems and operating equipment
- Carrying out maintenance, repair and testing work
- Fault analysis and troubleshooting on electrical and automated systems
- Reading and applying circuit diagrams, wiring diagrams and technical documentation
- Carrying out tests in accordance with applicable standards (e.g. DGUV V3)
- Support with optimisation and modernisation projects
- Compliance with safety, quality and environmental regulations

### Your profile

- Completed training as an electronics technician, mechatronics engineer or comparable qualification
- Quality and service-oriented approach
- Open to business travel and holder of a Class B driving licence
- Good written and spoken German (English desirable)
- Ability to work in a team and sense of responsibility
