

## Training position: Industrial mechanic – precision engineering (m/f/d)

**Training location:** Jena, Thuringia

**Start of training:** 1 September 2026

**Training duration:** 3.5 years (IHK qualification)

### About us

We are an innovative company in the field of device, testing and inspection technology and develop customised technical systems for industrial and specialised applications. Our training combines precision engineering, modern device construction and practical project work in a friendly and technology-oriented environment.

### Your tasks during the training

- Manufacture and assembly of precision mechanical components and assemblies
- Machining of metals and non-metals (turning, milling, drilling)
- Assembly, adjustment and testing of devices and technical systems
- Reading technical drawings and working according to parts lists
- Performing functional tests and quality controls
- Maintenance and servicing of machines and devices

### What you bring to the table

- Good secondary school leaving certificate, intermediate school leaving certificate or (technical) A-levels
- Interest in technology, mechanics and precision work
- Careful, structured and reliable way of working
- Ability to work in a team, willingness to learn and sense of responsibility

### What we offer

- Practical and sound training in an innovative field of technology
- Varied tasks in equipment and plant engineering
- Support from experienced specialists and trainers
- A friendly working environment and short decision-making processes
- Excellent chances of permanent employment after successful completion
