4H JENA ENGINEERING

Electronics Technician / Mechatronics Technician (m/f/d) wanted – permanent position in the Jena area

We are currently looking for a committed Electronics Technician / Mechatronics Technician (m/f/d) specialising in equipment manufacturing and system integration for a varied and technically challenging role at our Jena site.

Your focus will be on the assembly, wiring and integration of electronic and mechatronic systems, as well as their testing, troubleshooting and commissioning.

WHAT WE ARE LOOKING FOR

- Assembly, wiring and electrical installation of equipment, sub-assemblies and technical systems
- Assembly, integration and commissioning of our measurement, test and automation systems
- Testing of electrical and electronic components and documentation of the results
- Fault analysis and troubleshooting on equipment and customer-specific systems
- Carrying out maintenance, repair and servicing work
- Reading and applying circuit diagrams, wiring diagrams and technical documentation
- Carrying out and documenting electrical tests, e.g. in accordance with DGUV Regulation 3
- Supporting technical customer projects, as well as project-related commissioning and service calls both in Germany and abroad
- Working closely with development, design, manufacturing and project management

WHAT WE OFFER YOU

- **Working on challenging technical systems** – from wiring and integration through to testing and commissioning
- **Varied projects rather than traditional mass production** – we develop bespoke devices, assemblies and customer-specific system solutions
- **Flexible working hours** under our flexitime scheme
- A corporate culture that supports personal responsibility as well as professional and personal development
- **Job ticket and bike leasing**
- Support with the **company pension scheme**

WHAT YOU SHOULD BRING TO THE ROLE

- Completed training as an electronics technician, mechatronics technician or a comparable technical qualification
- A sound technical understanding and experience in the assembly, wiring and testing of electrical or mechatronic systems
- An independent, meticulous and quality-oriented approach to work
- An enthusiasm for troubleshooting, technical interrelationships and practical problem-solving
- Ability to work as part of a team, reliability and a sense of responsibility
- Willingness to undertake project-related business travel and assignments both at home and abroad
- Category B driving licence
- Good written and spoken German; knowledge of English would be an advantage
