4H JENA ENGINEERING

Industrial Mechanic (m/f/d) wanted – permanent position in the Jena area

Maritime Technologies / Marine Engineering

We are currently looking for a dedicated industrial mechanic (m/f/d) to take on a varied and technically stimulating role. We value initiative and a practical approach to finding solutions.

Maritime Technologies – Technology for research on and beneath the sea
Our oceans are among the most demanding environments for technical systems. It is precisely here that -4H-JENA engineering develops and manufactures specialised measurement and system solutions for marine and environmental research.

In our Maritime Technologies division, we develop specialised measurement and sensor systems as well as bespoke technical solutions for use on and under the sea. From mechanical manufacturing and assembly, through the construction of complex systems, to commissioning, various specialist departments work closely together – to deliver robust technology that is used worldwide in marine and environmental research.

WHAT WE ARE LOOKING FOR

- Construction and assembly of water measurement sections and flow measurement sections
- Construction of small-scale test and inspection facilities
- Assembly and commissioning of systems at our customers' premises
- Mechanical manufacturing and machining of components
- Working on conventional lathes, milling machines and other machine tools
- Adjustment, assembly and repair work
- Independently solving technical and mechanical problems

WHAT WE OFFER YOU

- **Working on the technology of tomorrow** – on sophisticated measurement and system solutions for marine and environmental research
- **Varied tasks rather than traditional mass production** – we develop bespoke systems and customer-specific solutions
- **Exciting, interdisciplinary and international projects** with a direct link to research, science and maritime technology
- **Flexible working hours** under our flexitime scheme
- A corporate culture that supports **personal responsibility as well as professional and personal development**
- **Job ticket and bike leasing**
- Support with the **company pension scheme**

WHAT YOU SHOULD BRING TO THE ROLE

Ideally, you will have completed an apprenticeship as an industrial mechanic, toolmaker, plant mechanic, mechatronics technician or hold a comparable technical qualification, e.g. as a plumber.

Even more important to us are:

- manual dexterity and technical understanding
- the ability to work independently and meticulously
- initiative and a passion for solving technical problems
- experience with conventional mechanical machining
- Willingness to undertake occasional business trips
- Ability to work as part of a team, reliability and a sense of responsibility
